

BASKET DISPLAY ARMS

Single Arm basket display bracket

Double Arm basket display bracket

Whether for permanent display or for merchandising, basket display arms provide a very effective way of displaying hanging baskets when no suitable hanging point is available.

Multiple hanging points on each arm cater for different size baskets or can be used for two smaller baskets. Utilising 'S' hooks can change the hanging height of the baskets creating an effective display.

The mounting plate must be securely fixed to the wall or support post. Use the double arm bracket for a corner position. The arms simply slot into place and can be removed if not required or when not in use.

Manufactured from steel, the brackets are zinc plated for corrosion protection and can be supplied in a black powder coated finish, if required.

39405	Single Arm bracket	Zinc plated
39406		Powder coated
39407	Double Arm bracket	Zinc plated
39408		Powder coated

All sizes are nominal
