

HOCKEY GOALS

Regulation size hockey goals complete with tubular frames to support the rear of the box net.

Sold in pairs and each goal is fitted with two wheels to enable the goal to be moved off court by lifting the front of the goal and rolling back.

Due to the nature of the game and particularly with repetitive goal shooting practice, damage to the base boards is inevitable so the goal is designed so that these are straightforward to remove and then refit replacements. Nets are available separately.

Full details available on request.
