

REVERSIBLE BASKETBALL TOWERS

Fixed height towers featuring round section steel posts with a welded cross arm to support the backboard on its steel frame and with a netball hoop on the back of the post. Nets are available separately.

Each unit is supplied with a matching ground socket with top flange. The post features a matching flange to ease the rotation of the unit, using the turning handle on the side of the post.

A locator bolt allows the post to be secured with either basketball or netball in the playing position.

BB058	Primary reversible tower Post – 76mm Hoop height – 2600mm Backboard projection – 600mm Backboard size – 1200 x 800mm	Each
