

All plant towers are manufactured from galvanised wire and can be powder coated black if required.

A variety of standard sizes are available in each design.

Due to transportation and packaging costs Open top and Apex plant towers will only be supplied to our customers based within the Auckland area.

The flat panel tapered or square designs feature three or four panels which are held together with a plastic reusable twist tie. These designs provide more cost-effective transportation options to our local and nationwide customers alike and can be packaged more sustainably.

Please contact us for our catalogue or to discuss the options we have available.

All sizes are nominal
