

ROSE UMBRELLA

Single piece top

Two piece (half) top

Single half top

(all shown with pole set)

With a spread of 800mm and a pole height of 2200mm, a rose umbrella is an excellent way to display roses or other climbing flowering plants to their best advantage.

The single piece top is ideal for younger plants which can grow through the top, while for established plants, the two-piece (half) tops are preferred because they can be fitted around the stem without causing unnecessary damage.

A single half top option with the pole set provides excellent support for plants growing close to a wall or fence.

For durability the rose umbrella top is manufactured from galvanised wire and Pregalvanised tube is used for the pole set. A black powder coat finish is available if required.

39150	Single piece top	Galvanised	
39151		Powder coated	
39152	Single half top	Galvanised	2 pieces required for full top
39153		Powder coated	
39155	Pole set	Galvanised	
39156		Powder coated
