

STEP STAND & END CAP

End cap (69153)

Step stand (69152)

The bottom shelf of the step stand measures 2000 mm x 500 mm at 400 mm above the ground with the top shelf measuring 2000 mm x 720 mm at 630 mm above bottom shelf.

An optional semi-circular end cap, measuring 1500mm wide and 750mm deep is shown attached to the step stand helping to maximise the available storage space but also enhances the end of any stand which can be more difficult to merchandise.

The mesh on each shelf measures 50mm x 50mm and all of the components are hot dipped galvanised to maximise durability and corrosion protection. Assembly is required once on site and all fixings required are supplied.

We can manufacture the step stand in any size to suit your facility and it can be finished without the signage header if preferred. Likewise, the end cap can be manufactured to suit other display stands. Please contact us to discuss your specific requirements.

All sizes are nominal
